

Mechanism of BRC Collaboration with Internal & External Researchers

Scope:

BRC has the vision of enhancing collaboration with internal and external researchers to:

1. Broaden the area of knowledge and expertise inside the centre.
2. Provide avenue and research facilities to young scientists.
3. Increase the visibility of BRC and QU.

Criteria, regulations, and expectations of potential collaborators at BRC

Priority for using the BRC facility will be for those:

1. Having major funding.
2. Having graduate/undergraduate QU students registered on the project.
3. Having equipment of applicable use in BRC.
4. Insuring BRC affiliation on any papers published from his/her work at BRC.
5. Align with BRC research activity.

Terms, conditions, and mechanism:

- Each collaborator who would like to occupy space at the BRC should provide a written request that will be studied by the management committee of the BRC (Online request form).
- Fill BRC required application forms.
- Extension of the project is applicable upon mutual agreement of both parties and outcome of the project.

Biomedical Research Center
New Research Complex (NRC), Zone 5
Qatar University
P.O. Box: 2713, Doha, Qatar.
